

Butt Seriously: TimeDoc Helps Close Open Colorectal Screening Gaps in 4 Weeks

Client Success Story

The Challenge:

A large community health center based in the Chicago area contracted with TimeDoc Health to virtually deliver chronic care management and remote patient monitoring. While managing these patients, it was noticed that 10% of the patient population had an open gap for colorectal cancer screening.

Colorectal cancer screenings are critical in for early identification. "Colorectal cancer incidence and mortality rates have dropped by over 30% in the U.S. among adults 50 and older in the last fifteen years, with a substantial fraction of these declines due to screening."⁽⁴⁾

The Solution:

TimeDoc Health had been working on a new care management module for closing care gaps and saw this as an opportunity to pilot the module while driving value to the client's patients and practice. The goal of this program was to get these care gaps closed and make sure the patients had their screenings scheduled or FIT tests ordered.

The Results:

In a matter of 4 weeks, the TimeDoc Care Services team was able to get over 70% of colorectal cancer screenings scheduled or fit test ordered by leveraging the new platform capability and care coordination workflow designed specifically to support patient care gap closure.

Now there's time for everyone.™

Combine the right technology platform with the right care coordinators.

Since 2015, TimeDoc has partnered with hundreds of healthcare organizations and provided millions of minutes of care coordination. Today, we're a trusted partner serving more than 70,000 patients across 120 provider organizations.

Make it easier for providers to support chronically ill patients between visits – while also maximizing reimbursements.

There's too much to do. Not enough time. And no matter how hard you try, next week will be even worse. The toughest thing about it all? ***Your most vulnerable patients are the ones feeling it the most.***

- 1 Keep It Simple** with an intuitive platform that gives you remote monitoring and chronic care management in one place, and that's easy for anyone on your staff to learn and use.
- 2 Keep It Connected** with a system that integrates with your EHR, plus dedicated care coordinators who connect with your patients.
- 3 Keep It Going** with a flexible, scalable model that gives you the option to use our care coordinators, yours, or a mix of the two.

Contact us today and learn how TimeDoc Health can help your organization deploy a remote monitoring program that stands the test of time and continuously delivers value to your patients and your providers.
